OBJETIVES

The agricultural producer and the intensive agricultural auxiliary industry are the key to this event.

Infoagro Exhibition is the perfect stage for companies to show their products and services to every agricultural agent in the same place.

The trade fair Infoagro Exhibition is an international point of reference for intensive crops and the best place to do business for the exhibitors, as well as for the producers.

CONTEXT

Infoagro Exhibition is a first-class event of intensive agriculture and the region of Almería has been chosen, due to its strategic localization, to hold this project. The province of Almería counts with more than **31,200 hectares** of covered agricultural land. Added to which, there are another **3,600 hectares** from the coast of **Granada** and **6,200 from Murcia**, both of which are neighboring provinces of Almería

EXHIBITION VENUE

The Palacio de Exposiciones y Congresos de Aguadulce, in Roquetas de Mar, is located at the center of the biggest greenhouse agricultural zone in Europe, and it is the ideal place to hold such event. 17,000 m² for exhibition.

REASONS TO EXHIBIT

INFOAGRO EXHIBITION is held in Aguadulce, Almería, Spain, at the most important agricultural producer center in Europe. The fair is focused on **intensive fruit and vegetable production**.

You will be able to meet directly with the most influential players in the European agricultural industry. The exhibition serves as a business epicenter for agricultural producers, showcasing the latest global innovations in intensive agriculture and knowledge transfer.

Therefore, this event takes place in the center of a province that has more than **31,200 hectares** of greenhouses: **Almería**.

6th International Trade Fair on Intensive Fruit & Vegetable Production and Auxiliary Industries

- From the **31,200 hectares** of greenhouses in the province, 21,000 are within a **20 km radius** from the exhibition.
- **75% of the production** is exported.

In this new edition:

- **+17,000 m²** for exhibition.
- **+600 exhibitors.** *2
- More than **49,000 professional** visitors.
- Conference rooms.
- Corporate presentation rooms.
- Meeting rooms B2B / B2C.
- Exhibitors **VíaECO** & **VíaSmart**.

VISITOR PROFILE

The visitor profile mainly consists of **agricultural entrepreneurs** who market their own production either independently or in partnership with other **producers and buyers** of products for both conventional and organic agriculture. This demographic is complemented by a notable presence of agricultural engineers and professionals from the agricultural industry. This edition expects to host **49,000 visitors** from the intensive horticultural industry, including consumers of agricultural inputs and technical materials.

Americas and Asia

The fair attracts a significant number of Hispanic American professionals, drawn by the longstanding prestige, influence, and business opportunities that Almería traditionally holds with the most important producing areas in the Americas. Infoagro Exhibition serves as the gateway to Europe for this productive industry. **Mexico, Guatemala, Peru, and Ecuador** have a prominent presence at the fair.

In recent editions, there has been an increase in business volume with **Asian companies**, which view Spanish intensive production as a model to emulate.

North Africa and Turkey

Due to its geographical proximity, a notable number of visitors come from North Africa, particularly Morocco and Algeria, with strong representation.

In recent editions, there has been a significant increase in the presence of Turkish exhibitors.

VIAECO & VIASMART DISTINCTIONS

Due to the significant interest in the **ecological, biological, or organic** world, the Infoagro Exhibition fair has brought together a large portion of companies that market products for organic agriculture or trade in organic production.

This edition will once again bring together the most important **BIOLOGICAL** manufacturers and producers under the identifier **ViaECO**.

VíaSMART is the distinctive label of the fair for exhibitors with Smart Agro solutions. These are companies offering products and services with agricultural applications of digital technologies.

These solutions encompass intelligent automation, robotization, equipment incorporating data processing, neural networks, data mining, computer vision, artificial intelligence, deep learning, and software applied to agriculture.
